

WKS is a Wood Door Manufacturing Company with more than 20 years of experience. Our solution driven approach to design and engineering satisfy the most demanding markets across the globe.

Our architectural doors and frames comply with American standards. We believe a door is more than a door; and WKS is more than just another manufacturer. WKS utilizes the highest technology that allows us to manufacture door and frame units with any type of hardware prep and design needed.

Our facility includes state of the art UV finishing and custom paint lines for specialty finishes. Our on time and complete, rate coupled with our quick lead-times and stellar quality are matched by no other in our industry. Satisfaction of our business partners is our goal.

### LEAD-LINED

These wooden doors are constructed with lead plates of different thicknesses and other materials that slow down the passage of neutrons and X-rays.

They are primarily used in medical laboratories, in areas with computed tomography and magnetic resonance imaging scanners.

### FRAMES

We are experts in providing you with a comprehensive solution, which is why we also manufacture wood frames that seamlessly integrate with the door design (door-frame). Available also with fire rated certification, these frames can be finished in the same style as the door, offering options such as wood veneer, decorative laminate, and paint.
